Art Unit: 1651

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claim(s) 1-23 drawn to a process of making a lactic acid bacterial culture in a medium containing at least one porphyrin compound.

II. Claims (s) 24 drawn to various lactic acid bacterial starter cultures.

III. Claim(s) 25 drawn to a process of making a fermented product.

IV. Claim(s) 26 drawn to a process of increasing the survival of lactic acid bacteria.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

First, the inventions of groups I-IV do not match a permitted category as PCT Rule 13.2 does not provide for multiple methods or products in one category. A variety of processes and compositions are claimed having distinct properties. For example, groups I, III and IV are drawn to include different processes having different steps and requiring different results or effects, for example, production of a starter culture of any lactic acid bacteria, production of any fermented product and increase in survival of any lactic acid bacteria.

No common inventive concept is shared among groups I-IV, since a technical relationship is lacking among the claimed inventions involving one or more special technical features because a process of culturing lactic acid bacteria in a culture medium containing a porphyrin compound are known. See, e.g., Kaneko *et al.*, U.S. Patent No. 5,075,226, Examples.

The requirement of unity of invention is not fulfilled because there is no technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

Art Unit: 1651

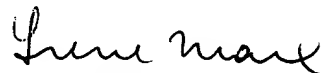

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
